LAGUNA COLLEGE OF ART + DESIGN

Self Reflected: Deeply fusing art and science  
to create the world's most complex artistic  
depiction of the human brain.

By Greg Dunn, PhD

The 6th Annual  
**Arnold Starr  
Lecture**

Nov. 10

5:30–7:30 p.m.

Gavin Herbert Eye Institute

Lecture presented by the UC Irvine Health  
Department of Neurology and exhibition  
presented in collaboration with  
Laguna College of Art + Design.

UC Irvine Health Advancement  
333 City Blvd. West, Ste. 605, Orange, CA 92868

Dr. Greg Dunn (artist and neuroscientist) and Dr. Brian Edwards (artist and applied physicist) created Self Reflected to reveal insight into the complexity of human consciousness. Self Reflected bridges the visual and conceptual connection between the macroscopic brain and the microscopic behavior of neurons by fusing neuroscientific data, hand drawings, algorithmic manipulation, optical engineering, photolithography, and gilding to etch half a million neurons into large sheets of gold.

**Thursday, Nov. 10, 2016**

**Reception and exhibition: 5:30 p.m.**

**Lecture: 6:30 p.m.**

**Gavin Herbert Eye Institute**

**850 Health Sciences Road, Irvine, CA 92697**

**RSVP:** Contact Sasha Advani at [sasha.advani@uci.edu](mailto:sasha.advani@uci.edu)  
or 714-509-2110 by Nov. 7, 2016. Seating is limited.
