About this Conference

Target Audience: Physicians and nurses working in Primary care, Internal Medicine, Neurology, Oncology and Critical Care, and all allied healthcare providers who want to broaden and update their knowledge of neurological and neurosurgical conditions.

Learning Objectives:

- Identify current screening, diagnosis, medical management and cutting-edge surgical strategies for patients presenting with the following selected diseases and/or disorders in order to improve quality of care and outcomes:
 - Epilepsy*
 - ALS/MDA/Neuromuscular Disorders*
 - Parkinson's Disease and Movement Disorders*
 - Multiple Sclerosis*
 - Stroke and Cerebrovascular Diseases*
 - Memory Disorders*
 - Brain, Pituitary and Spinal Tumors*
 - Spine Disorders*
- Identify the inclusion and exclusion criteria for prescribing current medications for neurological diseases.
- Recognize risk factors associated with stroke, including nonmodifiable risks, and use precaution strategies for patient care.
- Recognize and initiate management of acute life-threatening neurological conditions and determine the need for appropriate imaging and specialist consultation.
- List the various symptoms associated with the plausibility of a brain tumor.

Neurosciences Updates for Primary Care

Sept. 12, 2015

Course Description:

The 2015 Neurosciences Symposium has been developed to provide primary care physicians cutting edge medical and surgical information in the treatment of Epilepsy, Parkinson's Disease, Movement Disorders, Multiple Sclerosis, Neuromuscular Diseases, Brain Tumors, Memory Disorders and Stroke.

This one-day symposium will offer participants the knowledge and skills to help diagnose and treat patients with neurological disorders and conditions seen in general practice. A focus on differential clinical examination, efficient diagnostic testing and appropriate referrals to specialty practices will be presented by UC Irvine faculty from the departments of neurology and neurosurgery.
